Your Dream
Building Pre-Engineered for

Perfection

Products

Pre-Engineered Buildings (PEB)

Our Pre-Engineered Buildings are fully customized steel structures made from primary frames, secondary members, and roof & wall sheeting all designed for strength, speed, and flexibility. Add-ons like skylights, turbo vents, mezzanines, canopies, crane systems (up to 100 MT), and insulation can be included as per your needs. These buildings are lighter in weight, high in strength, and built to last. Ideal for factories, warehouses, malls, hospitals, schools, offices, showrooms, hangars, and more PEBs offer unmatched adaptability.

Smarter Steel Structures, Custom-Built for You.

What's Inside?

- Precisely engineered primary frames
- Cold-formed secondary structural members
- Optional mezzanine systems and crane setups
- Durable roof and wall panels
- Adaptable for a variety of building applications
- Insulation and sandwich panels for enhanced performance

Why Choose PEB?

Choosing our Pre-Engineered Buildings means faster construction, lower costs, and complete design flexibility. Whether you need large clear spans, energy-efficient roofing and wall systems, or long-lasting durability with minimal maintenance, our PEB solutions are built to deliver. With end-to-end responsibility from design to erection, we ensure quality, efficiency, and a hassle-free building experience.

“The Future of Construction Is Here.”

- ✓ Built to Last.
- ✓ Designed for Performance.
- ✓ Delivered with Precision.

Structural Steel Buildings

At RSSLTD, we specialize in structural steel solutions that power progress. Our buildings are engineered to meet the evolving demands of industries across the spectrum from multi-storey developments to heavy-duty industrial plants. With a focus on workshop-fabricated steel, we ensure unmatched precision, reduced project timelines, and greater cost-efficiency. Each component is crafted under

strict quality control, ensuring long-term durability, safety, and seamless on-site assembly.

Whether you're building upward or outward, our steel structures offer the flexibility to scale, adapt, and perform. Backed by cutting-edge technology and a skilled engineering team, we turn complex challenges into strong, lasting structures delivered on time, every time.

01

Multi-Storey Buildings

Efficient, fast, and flexible. Built using prefabricated steel components for offices, hotels, apartments, and more. These structures allow for quicker construction, easy expansion, and consistent quality ideal for modern spaces.

02

Technological Structures

Engineered for demanding industrial environments. Designed to support piping systems, boilers, and heavy machinery with total stability. Perfect for power plants, chemical units, and processing zones where performance is non-negotiable.

03

Heavy Structures

Custom-designed steel for high-load projects including power stations, oil & gas facilities, airports, and mega infra builds. Fabricated in workshops to ensure precision, safety, & a seamless on-site installation experience.

Automated Storage and Retrieval Systems (ASRS)

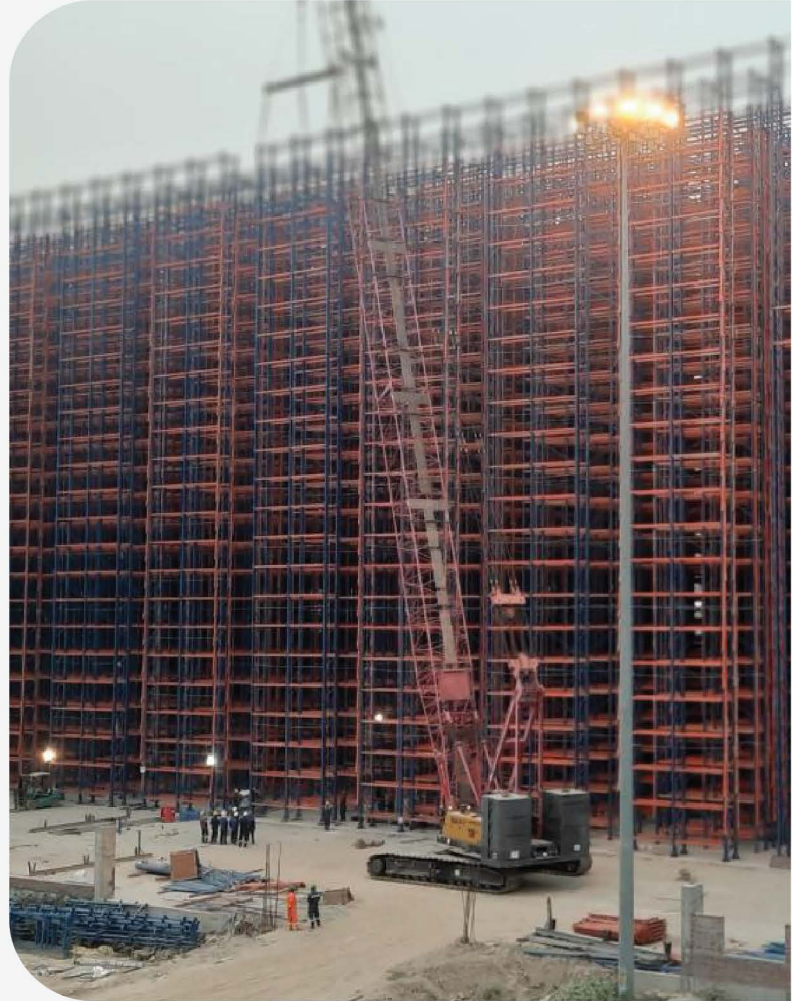

Automated Storage and Retrieval Systems (ASRS) reduce manual handling, save time, and boost accuracy in warehouses with high SKUs or order volumes. Solutions like vertical lifts, shuttles, and carousels help you pick faster, store more efficiently, and minimize errors all while lowering labor costs.

- Fast & Accurate Picking
- Space-Saving Design
- Reduced Manual Errors
- Seamless Automation

Turnkey & Civil Solutions

At Rishikesh LTD, we deliver end-to-end Turnkey & Civil Solutions that simplify complexity and ensure total project control.

From design to delivery, our multidisciplinary teams bring together engineering expertise, modern technology, and deep industry experience to execute projects of every scale efficiently and sustainably.

Construction Excellence

We specialize in executing high-value civil projects while maintaining a strong focus on green, eco-conscious practices. Our builds reflect strength, safety, and responsibility driven by precision and professionalism.

Complete Infrastructure Solutions

Positioned as a premium infrastructure provider, Rishikesh LTD is equipped to design, build, install, and manage everything under one roof delivering fully integrated solutions on time and within scope.

Project Management

We approach every project with insight, agility, and innovation. Whether adopting new technologies or applying human intelligence, our experienced teams ensure flawless execution, clear communication, and reliable outcomes.

Infrastructure:

- 46,000 MT annual capacity
- 4,50,000 sq.ft covered area
- 4,00,000 sq.ft openarea
- 50 MT single column handling capacity
- Software: STAAD Pro, MBS, BOCAD, Tekla
- ISO 9001: 2015 (QMS)
- ISO 14001: 2015 (EMS)
- ISO 45001: 2018 (OHSAS)

300+

Completed Projects

50+

High Complexity Projects

Why Choose Us?

- Expertise in handling high-complexity projects
- Unwavering commitment to quality- no compromises
- Competitive pricing with exceptional value
- Timely delivery backed by proven processes
- Deep focus on sustainability and responsible building
- Every project tailored to meet client-specific needs

About Us

Rishikesh Structural Solutions Limited is a leading pre-fabrication company specializing in high-quality structural solutions. Since 2015, we've delivered innovative, reliable projects across diverse industries with a focus on precision, safety, and client satisfaction. With a dedicated team and a state-of-the-art manufacturing facility in Kurali (Karjan), Gujarat, we serve clients across India and beyond—building not just structures, but long-term partnerships.

VISION

To become the most trusted and preferred partner for Infrastructural development in India and across global markets.

MISSION

To deliver high-performance solutions with uncompromising quality & safety by empowering infrastructure growth through innovation, efficiency, and integrity.

Our Journey

2010

Delivered 15 turnkey projects in collaboration with PEB partners

2015

Incorporation of Rishikesh Structural Solutions LLP

2016

First shade of 5000 sq. ft

2017

Fully operational plant with capacity of 10,000 MT. per annum.

2019

Executed a single project order worth ₹69 Cr for HMEI Bhatinda Refinery

2020

Fully operational plant with capacity of 10,000 MT. per annum.

2022

Achieved completion of the world's biggest copper plant at Mundra (₹134 Cr project)

2024

Upgraded facility to handle 50 MT per single column, with a total capacity of 46,000 MT

2025

Successfully completed two power plant projects (Mahan Energy Limited & Raigarh Power Plant), each valued at ₹80 Cr
